

FLUIDYNE High Performance Cooling Products ~ For The Street, Strip & Track

INSTRUCTION SUPPLEMENT FOR FHP30-03COB-HX INSTALLATION

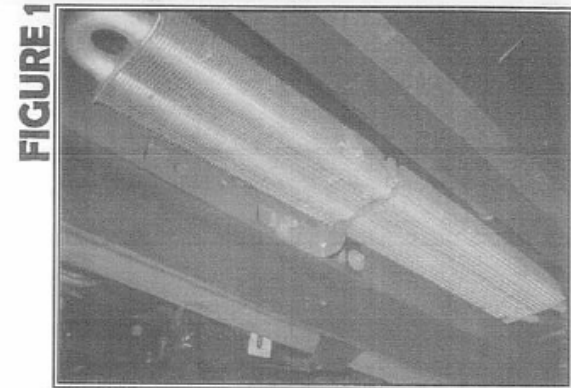

To accommodate the thicker high performance FLUIDYNE High Performance heat exchanger, adjustment to the power steering cooler location is necessary.

Included with the FHP30-03COB-HX should be:

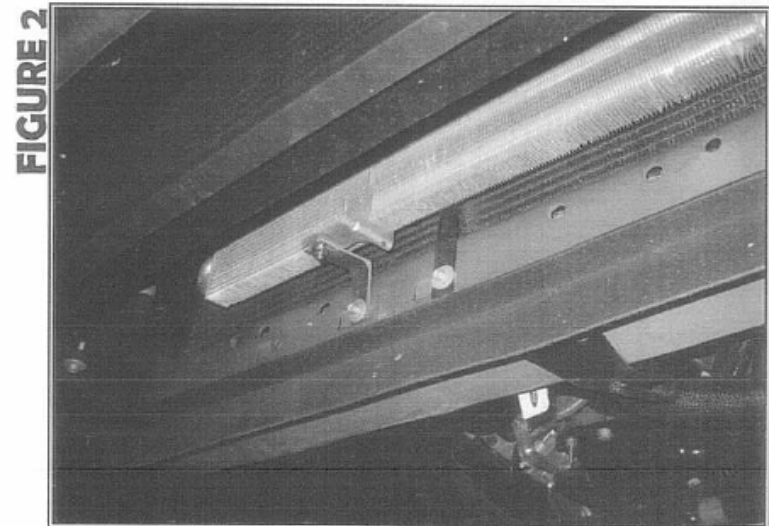

- one (1) bracket
- one (1) 6MM bolt and nut
- two (2) flat washers

INSTRUCTIONS:

Remove the bolt holding the cooler in the factory location (Figure 1). Use the supplied nut, bolt and washers to attach the supplied bracket to the existing cooler bracket, as shown in Figure 2. Rotate the cooler so that the lower hole on the supplied bracket lines up with the original mounting hole on the frame. Use the factory bolt to mount the new bracket to the frame.
